

CIUS Seminar SS 2016

Core Facility Cell Imaging and Ultrastructure Research

Di 1.3.	Vorbesprechung
Di 8.3.	No seminar_presentation of new Dean (faculty members only)
Di 15.3.	Daniela Gruber (CIUS): "Sicherheitseinschulung EM Lab"
Di 5.4. HS 7, UZA2	Participation at the Flash-Talk-workshop: „Forschungsverbund Umwelt“, (registration necessary: umwelt@univie.ac.at)
Di 12.4.	Irene und Josef Lichtscheidl (CIUS): "A journey to Oman – impressions and pictures"
Di 19.4.	Waltraud Klepal (CIUS): "From hammer and chisel to the electron microscope – an overview of my scientific activities"
Di 26.4.	Ilse Foissner (Cell Biology, Uni Salzburg): "Longer, faster and highly adaptable: <i>Chara australis</i> , the alga of superlatives!"
Di 3.5.	Barbara Hefel (CIUS): "EDX analysis of glands in aquatic carnivores"
Di, 10.5.	Michal Goga (CIUS/Jozef Safarik University, Kosice): "Allelopathic effect of lichen secondary metabolites cause changes of growth in <i>Physcomitrella patens</i> "
Di 24.5.	Stephan Manhalter (CIUS): "The effect of plant available silicon on mosses using the example of <i>Physcomitrella patens</i> "
Di 31.5.	Jan Wiederhold (Dept. of Environmental Geosciences, Uni Wien): "Current research in environmental geochemistry: metals and plants"
Di 7.6.	Eva Oburger (Institute of Soil Research, BoKu): "The biogeochemistry of W in the plant-soil environment"
Di 14.6.	Rebecca Steinacher (CIUS): "Bioremediation by <i>Phormidium</i> biofilms – cultivability, ultrastructure & localisation of copper"
Di 21.6.	Sarah Sidra (CIUS): "The remediating effects of yeast on the heavy-metal plant <i>Arabidopsis arenosa</i> " Margret Eckhart (CIUS): "How to preserve a moss for element analysis? Different ways for optimal preparation in electron microscopy"
Di 28.6.	Closing event – details to be announced
Di 12.7.	Students of the heavy metal course present their results 9.00-14.00, Konferenzraum Ökologie, UZA1

Gäste sind herzlich willkommen!

Ort und Zeit: Wenn nicht anders angekündigt, 14¹⁵, Konferenzraum Zoologie
